DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. The claims only recite structure of the invention. There is no functional recitation in the claims. What does the "Apparatus for playing cards" do? There must be a recitation that the apparatus is a playing card shuffling device and a playing card dealing device.
4. In claim 1, line 7 the recitation "a radial dealer arm" is indefinite because there is no functional recitation of the "radial dealer arm" in the claims. There is no functional recitation that the radial dealer arm somehow transports playing cards from the card magazine to at least one player's field.
5. In claim 1, line 10 the recitation "a card magazine" is indefinite because there is no positive recitation of "playing cards" in the claims, and there is no functional recitation that playing cards are held or placed inside the card magazine.
6. Claim 1, line 11 recites "a dealing device". What does the "dealing device" do? This is indefinite because there is no functional recitation in the claims that the dealing device somehow deals playing cards.

Art Unit: 3711

7. In claim 1, line 12 the recitation "an endless belt-conveyor" is indefinite because there is no functional recitation of the "endless belt-conveyor" in the claims. There is no functional recitation that the endless belt-conveyor somehow transports playing cards from the card magazine to at least one player's field.

8. Claim 1 recites other elements, e.g. "a card showing window", "a display", "a keyboard", "permanent magnets", "two card lifting devices", "electromagnets", "a drive", "a driving drum", "card identifying sensor" and "a computer". All these recitation are indefinite because there is no functional recitation in the claims describing exactly what role these elements play in the shuffling and dealing of the playing cards.

9. Claim 1, recites the limitation "the plate" in line 4. There is insufficient antecedent basis for this limitation in the claim.

10. Claim 1, recites the limitation "the card identifying sensor" in line 31. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

11. The following is a statement of reasons for the indication of allowable subject matter: The patents to Stroud, Tauschek, Fuller, Sivertson, Sobajima, Lamle and Kaji et al. all disclose playing card dealing and/or shuffling devices.

12. None of the cited references alone or in combination teach "a radial dealer arm is arranged under the plate of the gambling table and pivotably supported on a vertical shaft placed in the centre of curvature of the half-round gambling table, at the end of the dealer arm near the shaft a card magazine and a dealing device are arranged, on the

dealer arm an endless belt-conveyor is supported having a horizontal carrying section extending parallel to the plate of the gambling table between the card magazine and the outer end of the dealer arm" and "two card lifting devices are mounted onto the dealer arm the one is in a radial distance of and aligned with the card showing window or the player's field, the other is in a radial distance of and aligned with the card showing window of the dealer's field".

13. Claims 1-6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
